Foaming molds

We combine in-depth experience with cutting-edge technology to meet the highest possible standards of quality, appearance, and reliability in a competitive market.

As a high-tech division of an international steering wheel manufacturer, we have extensive experience of tooling for foamed parts, and our processes and machines are ideal for making foam tools of up to 640 x 640 x 300 mm.

Our steel and aluminum tools cover your inserts with foam and can be equipped with sensors to ensure optimum production quality.

Your benefits at a glance:

- Extensive experience
- Attractive look and feel
- Good chemical and mechanical resistance
- Low tooling cost per piece
