

# Optimizing processes.

— Joyson Tooling Europe

— Tooling and plant construction / Product portfolio

## Production and special machinery

Efficient processes make production plant and machinery a key success factor, while ergonomics and system design ensure that assembly equipment helps to fulfill desired cycle rates.

From design to implementation, we're experts in assembly and processing machinery. Together with you, we'll develop the ideal solution for your product and production applications.

We offer everything under one roof — from manual workstations to fully automated machines.

### Your benefits at a glance:

- Optimized assembly or processing time (based on MTM or REFA)
- Process quality control
- Low specific machine costs
